 PT Isolation and purificn of peptide(s) from fusion protein constructs
 PT - which include a carbonic anhydrase and a variable fused
 PT polypeptide
 XX
 PS Claim 18; Page 47; 67pp; English.
 XX
 CC A new method for the isolation and/or purification of a recombinant
 CC peptide employs a fusion protein construct (FPC) comprising a
 CC carbonic anhydrase and a variable fused polypeptide containing a
 CC target peptide. The method comprises precipitating either the FPC or
 CC a fragment of the FPC including the carbonic anhydrase. An
 CC alternative method of producing the peptide comprises expressing the
 CC FPC as part of an inclusion body. The target peptides of the FPC are
 CC derived from growth hormone releasing factor (GRF), glucagon-like
 CC peptide 1 (GLP1) or parathyroid hormone (PTH). Thus sequence
 CC corresponds to amino acids 7-34 of GLP1.

Composition containing stimulators of cyclic nucleotide monophosphate

Claim 30: Page 18; 38pp; German.

This invention describes a composition containing at least two of the components (a) hormone that stimulates production of cyclic adenosine monophosphate (cAMP) (b) inhibitor of cyclic nucleotide degradation and (c) hormone that stimulates production of cyclic guanosine monophosphate (cGMP). This composition has antidiabetic, hypoglycaemic, and anti-obesity activity. The product described in the invention can be used for treatment of (i) diabetes mellitus (non-)insulin dependent or mature onset diabetes, (ii) secondary hyperglycemia associated with pancreatic disease (chronic pancreatitis, pancreasectomy or hemochromatosis) or endocrine disease (acromegaly, Cushing's syndrome, pheochromocytoma or hyperthyroidism), (iii) iatrogenic hyperglycemia (e.g. caused by benzothiadiazine diuretics, diazoxide or glucocorticoids), (iv) pathological glucose tolerance, (v) hyperglycemia, (vi) dyslipoproteinemia, (vii) obesity, (viii) hyperlipoproteinemia and/or hypotension.

PT Preparation of peptide with C-terminal alpha-carboxamide residue, e.g.
PT growth hormone releasing factors comprises treating substrate with
PT ammonia in presence of clostripain
XX
PS Example 1; Page 16; 48pp; English.
XX
CC The present sequence is a modified Glucagon like Peptide (GLP) fragment.
CC This sequence is composed of residues 7 to 34 of GLP, and was produced
CC by attempted clostripain catalysed amidation of another modified GLP
CC fragment (AAB07291) at pH 7.9. Hydrolysis at Lys34 occurred to produce the

present sequence. The expected product would have had a C-terminal alpha-carboxamide residue. The peptide of AAB07291 was treated with an ammonia reagent and clostripain (also known as clostriidopeptidase B). Clostripain is an extracellular thiol endoprotease from Clostridia. Clostripain cleaves arginine containing peptides amidatively at an Arg-Xaa peptide bond.

PT Differentiation of non-insulin producing cells into insulin-producing
PT cells by glucagon-like peptide-1 or extendin-4, used to treat diabetes
PT mellitus
XX
PS Disclosure; Page 16; 119pp; English.
XX
CC This sequence represents a glucagon-like peptide-1 (GLP-1) fragment.
CC GLP-1 is a hormone normally secreted by neuroendocrine cells of the gut,
CC in response to food. GLP-1 fragments or Extendin-4 growth factor
CC fragments can be used in the production of a population of
CC insulin-producing cells from a population of non-insulin producing cells.
CC The methods may also be used to promote pancreatic amylase producing
CC cells to produce both insulin and amylase. The methods are used to treat
CC diabetes mellitus (type 1) in humans, domesticated animals, livestock and
CC pets.

 PT New glucagon-like peptide 1 derivatives - have insulinotropic
 PT activity and are used to treat Diabetes mellitus
 XX
 PS Claim 1; Page 20 and Fig 1; 16pp; English.
 XX
 CC The sequence given is derived from glucagon-like peptide 1 (GLP-1)
 CC and has a higher insulinotropic activity than GLP-1 (1-36) and GLP-1
 CC (1-37). The peptide may be modified to a acid addn. or carboxylic
 CC acid addn. salt or lower alkyl ester and amide (lower (di)alkyl amide)
 CC

CC derivative. These modified derivatives have the same insulinotropic
 CC activity as the original GLP-1 derivative. These peptides are used
 CC in the treatment of maturity onset diabetes mellitus (MODM). They
 CC may also be used in the study of MODM pathogenesis. Dosages can be
 CC administered intravenously, intramuscularly or subcutaneously.

XX PT Treatment of non-insulin dependent diabetes mellitus - using a
XX PT glucagon-like peptide 1 or deriv. with prolonged action for
XX PT sustained glycaemic control
XX PS Claim 2; Page 46; 70pp; English.
XX XX
XX CC This peptide is GLP-1(7-35) [GLP = glucagon-like peptide], a truncated
XX CC deriv. of GLP-1. GLP-1 and its deriv.s are useful in the treatment of
XX CC Non-Insulin dependent diabetes Mellitus (NIDDM). During processing in
XX CC the pancreas and intestine, GLP-1 (AAR63245) is converted to a 31 amino
XX CC acid peptide having amino acids 7-37 of GLP-1, alternatively referred
XX CC to as Insulinotropin. GLP-1(7-37) has insulinotropic activity, ie. it
XX CC is able to stimulate, or cause to be stimulated, the synthesis of the
XX CC hormone insulin. Other derivs. of GLP-1 are shown in AAR63246-51. It
XX CC has been discovered that prolonged plasma elevations of GLP-1, and
XX CC related polypeptides, are necessary during the meal and beyond to
XX CC achieve sustained glycaemic control in patients with NIDDM. The invention
XX CC provides a compsn. that has prolonged action after each administration.

 CC HEIGHT IN THE SMALL INTESTINE, CONCOMITANT WITH INCREASED CRYPT
 CC CELL PROLIFERATION AND DECREASED ENTEROCYTE APOPTOSIS.
 CC -1- INDUCTION: PRODUCED IN THE A CELLS OF THE ISLETS OF LANGERHANS
 CC IN RESPONSE TO A DROP IN BLOOD SUGAR CONCENTRATION.
 CC -1- PHARMACEUTICAL: Available under the names Glucagon (Eli Lilly) and
 CC Glucagon or Glucagon Novo Nordisk (Novo Nordisk). Used to treat
 CC severe hypoglycemia in insulin-dependent diabetics.
 CC -1- SIMILARITY: BELONGS TO THE GLUCAGON FAMILY.
 CC -1- DATABASE: NAME=Glucagon at Eli Lilly;
 CC NOTE=Clinical information on Eli Lilly glucagon products;
 CC WWW="http://www.lillydiabetes.com/products/PatientInfo.cfm".
